#### DETAILED OFFICE ACTION

### **INTRODUCTION**

1. This application/control number 10/723,149 has been examined. Applicant's election without traverse of Species I (Figure 1), claim 1-8, 13 and 17-18 in the reply filed on 7/26/04 is acknowledged.

# **Drawings**

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the power source includes battery as claimed in claim 4, flat heating element as claimed in claim 5, curved heating element as claimed in claim 6, heating element positioned between rows of bristles as claimed in claim 7, heating element positioned at a lateral edge of the base portion as claimed in claim 13, comb as claimed in claim 17 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement

Application/Control Number: 10/723,149 Page 3

Art Unit: 3742

Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

# Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-3, 6-7, 13, 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Gress (US4217915).

Gress discloses a hair straightening device as shown in the drawings, comprising a handle (3), a base portion (2) having a proximal end adjacent to the handle, a distal end and a surface (8), a plurality of bristles (1) having a tip, a curved heating element (12) extending between the proximal end and the distal end of the base portion and is positioned at a lateral edge of the base portion, the heating element having a heated surface that is positioned between the surface of the base portion and the tips of the bristles, a power source including an electrical cord (5) with plug (6) configured to be plugged into an electrical outlet, the heating element is positioned between the rows of bristles.

5. Claims 1-5, 7, 13, 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hashimoto (US5064993).

Application/Control Number: 10/723,149 Page 4

Art Unit: 3742

Hashimoto discloses a hair straightening device as shown in the drawings, comprising a handle (2), a base portion (1) having a proximal end adjacent to the handle, a distal end and a surface, a plurality of bristles having a tip, a flat heating element (3) extending between the proximal end and the distal end of the base portion and is positioned at a lateral edge of the base portion, the heating element having a heated surface that is positioned between the surface of the base portion and the tips of the bristles, a power source (b) (batteries) for heating the heating element, plug (7) connected to battery holder (9) with batteries through a cord (8) can be inserted in the receptacle (6) to supply the power(see column 5, lines 17-21), wire (the heating element is positioned between the rows of bristles.

## Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claim 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gress (US4217915) or Hashimoto (US5064993) in view of of Kwan (US6053180).

Neither Gress or Hashimoto does not disclose a heating element configured to be heated to a temperature between 150° F and 600° F.

Kwan discloses hair styling apparatus comprising a hair styling apparatus an discloses (column 1, line 9-16) suitable temperature can be programmed according to different hair textures and hair styles desired, in short it depends on intended use of the device.

Art Unit: 3742

It would have been obvious to provide a heating element capable of generating temperature between 150°F and 600 °F as taught by Kwan for the device of Gress or Hashimoto to obtain desired temperature for desired hair textures and styles.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vinod D. Patel whose telephone number is 703-308-5227. The examiner can normally be reached on 7.30 A.M. TO 4.00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 703-305-5766. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
